MISCELLANEOUS: To January 1st, 1913, this company levied an assessment annually September 1st, for the losses and expenses of the fiscal year ending on that date. The assessments were net, hence no dividends were paid, and there was no liability for unearned premiums. The company reorganized January 1st, 1913, on contingent liability basis, hence on new business thereafter collects one annual premium, in advance. Business written after January 1st, 1913, is subject to legal reserve and dividends. As all policies are for five-year term the premiums written in 1914, \$33,399, represent about two-fifths of the company's business.

MISCELLANEOUS: This company secured its charter January 28, 1907, starting with applications for insurance for over \$200,000, and began issuing policies February 28. All policyholders have an assessment liability of three times the annual premium. No non-assessable policies are issued. As its name implies, the company writes lumber yards and wood workers. Its directors are men actively engaged in the lumber business. A fund of \$10,000 was advanced by the directors in 1907, which amount has been paid off.

LLOYDS AND RECIPROCAL UNDERWRITERS ASSOCIATIONS

Aside from the Lloyds and inter-insurance associations located in New York State, and which are required to file sworn annual statements with the Insurance Department, there are few such associations which do report to any State Insurance Department. Those which do not report must be judged in accordance with the character and past record of their managers, in conjunction with the financial standing and reputation of the underwriters. The subscribers usually assuming obligations for specified amounts in addition to any initial deposits which they may have made—and in some cases assuming an unlimited additional liability—much depends upon the responsibility of the underwriters, as well as upon their punctuality in meeting obligations. As the liability assumed is individual, and not joint (with one or two exceptions), it is essential to the value of a policy in its entirety that each and every underwriter subscribing thereto shall be good for his share of the aggregate insurance; for if one underwriter proves to be unable to pay his share, it cannot be recovered from the others. The character of the management also counts for a great deal in estimating the value of a Lloyds policy; for, although the Lloyds may have a strong list of underwriters, a reckless or plunging manager may involve the concern so deeply in losses that the latter would greatly exceed the maximum liability of the underwriters, with consequent loss to the insured. In the past, Lloyds policies have been sold whose underwriters were, in some cases, found to be transient occupants of cheap lodging houses, who cheerfully assumed an unlimited future liability for a five-dollar bill in hand, and would throw in an affidavit that the subscriber was worth one million dollars! Some of the "securities" claimed by certain fraudulent concerns had as little tangible value as the affidavits referred to. These matters are merely cited to indicate the importance of investigating the character and standing of Lloyds associations and companies before accepting and relying upon their policy contracts. There are Lloyds and inter-insurance associations in business to-day which have long and honorable records, and whose policies may be accepted with confidence. Careful discrimination should be exercised between such associations and those which may be classed as totally irresponsible, or those which habitually scale their loss payments.

RISKS AND PREMIUMS: Fire risks in force, December 31, \$40,800,825; premiums thereon, \$276,969.

BUSINESS SINCE ORGANIZATION: Premiums received, \$3,572,771; losses paid, \$3,843,418; dividends declared, \$3,266,244.

MISCELLANEOUS: The foregoing statement is a summary of 286 private accounts of subscribers, who reciprocate fire insurance indemnity in the office of the attorney. (Transacts only

inter-insurance between members.) Conflagration losses: Baltimore, 1904, \$441,000; San Francisco, 1906, \$209,500. Members underwrite the risks of other members to the extent of \$500, \$1,000, \$1,500 or \$2,000 each, according to their own requirements as policyholders, each member in a particular class insuring each other member of that class an equal amount, also each member of the other three classes, but not exceeding the limit of his own or their class. Each member deposits the amount which he will assume on a single risk, thus constituting an emergency fund, upon which 6% interest is allowed. After the accumulation of an amount equal to his emergency fund deposit, a subscriber is entitled to receive dividends from surplus earnings. Members may withdraw on one day's notice, and their outstanding risks will be assumed by the remaining underwriters. The liability assumed by a subscriber in a city block is no greater than he assumes on a single risk, and each member's conflagration liability is limited to ten times his deposit.

RISKS AND PREMIUMS: Fire risks in force, December 31, \$9,742,571; premiums thereon, \$159,001.

MISCELLANEOUS: Formed as Underwriters at Mutual Lloyds, the word "Lumber" was prefixed July 9, 1900, and on December 31, 1906, the words "at Mutual Lloyds" were eliminated. As its name indicates, this association makes a specialty of lumber and woodworking risks. The chief parties in interest are identified with the National Wholesale Lumber Dealers' Association. There is deposited by underwriters \$100,000, of which \$37,500 is treated as capital and the balance as surplus. Each of the fifteen underwriters has deposited \$6,666, making a total of \$100,000, but owing to the strictness of the New York Insurance Law, which does not allow credit for reinsurance in unauthorized companies and does not permit any impairment,

however slight, of the deposits which are regarded as equivalent of capital, the Lumber Underwriters only reports as deposits (that is, the equivalent of capital) the sum of \$37,500, considering the remaining \$62,500 as surplus. In New York State, therefore, the Lumber Underwriters reports but \$37,500 as deposits of underwriters; whereas, according to the customs of other States, the deposits would be considered as \$100,000. The attorney, under the form of agreement, is permitted to call upon the underwriters for \$100,000 each additional in case of the \$100,000 deposit becoming impaired. In the event of sufficient impairment he is to call together the executive committee. The attorney advises us that the underwriters assume unlimited liability, that is, in the event of loss sufficient to take the \$100,000 and accumulated surplus in excess, each underwriter is liable to lose his entire fortune according to the policies upon which he may be an underwriter.

BUSINESS SINCE ORGANIZATION: Premiums received, \$780,142; losses paid, \$261,874; dividends declared, cash, \$363,819.

MISCELLANEOUS: This organization now writes \$4,000 on detached yards, and smaller lines on exposed yards, except those exposed by long frame ranges and special hazards. It collects full board rates (minimum 1%). Each subscriber deposits \$1250; his account is then credited with his proportion of the

premiums written daily; when such credits amount to \$25, the \$25 is added to his deposit, and the \$37.50 is set aside to his account as his reserve fund. All amounts credited to his account thereafter are returned to him in dividends at each annual statement, less 20%, and his proportion of losses and expenses. The association seems to be carefully managed.

ASSETS, DEC. 31, 1914: Real estate, \$57,000; mortgage loans, \$27,500; bonds and stocks, \$16,934; cash, \$30,125; deposits due, \$3,001; interest and rents, \$2,103; assessments due, \$12,662; total, \$148,325; liabilities: Members deposits, \$108,762; surplus, \$39,563; net fire losses incurred, 1914, \$194,508; fire risks in force, \$6,131,500. Losses paid since organization, \$194,508.

MISCELLANEOUS: This is an inter-insurance association formed by the members of the Western Retail Lumbermen Association, Spokane, Wash. Its operations are confined to the retail

lumber yards in the ten western states between Canada and Mexico. The maximum liability on any one risk is \$10,000. Each member's liability is limited to the sum of 2 annual premiums. Annual premium deposits are made at board rates as guarantee of payment of assessments, which are levied semi-annually. These amount annually to 40% of the premium deposit. The affairs of the Society are in the hands of a managing board of nine, from which three are selected as an executive committee.

LUMBERMENS UNDERWRITERS, Houston, Tex.

E. D. Holt, Attorney-in-fact.

This designates an office where retail lumber dealers of Texas exchange indemnity with each other for a limited amount against loss by fire to their own lumber yards at actual cost. The plan was adopted at the 1900 meeting of the Lumbermen's Association of Texas and we are advised by the attorney that the arrangement is entirely satisfactory to its participants.

NATIONAL UNION FIRE INSURANCE EXCHANGE OF LIQUOR DEALERS, Kansas City, Mo.

Attorneys, D. J. Flintner & Co. Organized, 1913.

This is an inter-insurance exchange organized in July, 1913. It has a reinsurance contract with an old time fire company whereby that company assumes all liability taken by the National Dealers. All applications for insurance obligate the insured for an additional

premium equal to the one collected. All risks written at tariff rates. The attorneys advise us that when the members are sufficient to justify it they will assume their own liabilities. No statement for 1914 has been obtainable, though requested.

MISCELLANEOUS: The foregoing statement is a summary of about 495 private accounts of subscribers who reciprocate fire insurance indemnity in the office of the attorneys. (Transacts only inter-insurance between members.) Each member becomes liable to the extent of not exceeding \$2,000 for each risk. This amount is not paid in, but premiums are credited to his account until they amount to \$4,000, any excess being subject to withdrawal. Writes sprinklered business only. Limit of liability of each subscriber in a local conflagration is \$20,000; which, however, may be reinsured in excess of the first \$20,000.

BUSINESS SINCE ORGANIZATION: Premiums received, \$269,894; losses paid, \$71,324; dividends declared, cash, \$75,670.

This association was organized November 1, 1906, by J. W. Garvey, who also manages the Lumbermens Exchange and the Reciprocal Underwriters, both of Kansas City. Each subscriber

deposits \$20 for each risk which he wishes to insure, his account is then credited with his proportion of the premiums written daily, when these credits amount to \$40, said amount is added to his deposit of \$20, and the \$60 is set aside to his account as his deposit and reserve fund. All amounts credited to his account thereafter are returned to him in dividends at each annual statement, less 20% and his proportion of losses and expenses. Should a member withdraw, his deposit is returned to him, also his reserve fund, less the amount it would take to carry the indemnity extended by him to the expiration of policies in force.

ASSETS, DEC. 31, 1914: United States bonds, \$25,000; state bonds, \$12,349; county bonds, \$60,838; municipal bonds, \$364,165; real estate mortgages, \$21,500; guarantee fund, \$395,900; net deposits in course of collection, \$31,720; cash in banks, \$149,796; total, \$1,061,267; Liabilities: Losses unpaid, \$21,025.

MISCELLANEOUS: This is a reciprocal insurance institution of which Bruce Dodson, of Kansas City, Mo., is manager. It was established in 1900 and has several departments covering the separate classes insured, all of which are similar, having the hazards of manufacturing risks and coming within the same general classification. The departments include the Bakers Reciprocal Exchange (1905), Brewers Reciprocal Exchange (1900), Ice Manufacturers Reciprocal Exchange (1901), Launderers Reciprocal Exchange (1905), Publishers Reciprocal Exchange (1911) and Ice Cream Manufacturers Reciprocal Exchange (1914). Separate statistics are kept for the industries which are grouped into three special classes. Brewers is classified separately, while

the Launderers, Bakers and Publishers are grouped together, as are also the Ice Manufacturers and the Ice Cream Manufacturers. The savings to subscribers are credited according to the class to which they belong. Since organization, the manager informs us, it has shown an average annual saving of over 40%.

Under the plan of the Reciprocal Exchange, all funds are available for the payment of losses; therefore, there is no reinsurance reserve liability. However, if from the actual cash assets as shown in the statement as of January 1, 1914, a reinsurance reserve equal to 50% of subscribers' current deposits should be deducted, the Exchange would, over and above such reinsurance reserve and the subscribers' guarantee fund, have a net cash surplus of \$740,539. The expenses of management amount to 25% of the premium deposit of members. The above is the statement of the combined departments. For details of special classes see various departments listed in foregoing.

MISCELLANEOUS: J. W. Garvey & Co. are also managers of the Reciprocal Annex and the Lumbermen's Exchange. Each member deposits \$20 for each risk which he wishes to insure, his account is then credited with his proportion of the premiums written daily, when these credits amount to \$40, said amount is added to his deposit of \$20, and the \$60 is set aside to his account as his deposit and reserve fund. All amounts credited to his account thereafter are returned to him in dividends at each annual statement, less 20% and his proportion of losses and expenses. Should a member withdraw, his deposit is returned to him, also his reserve fund, less the amount it would take to carry the indemnity extended by him to the expiration of policies in force.

SAM HOUSTON INTER-INSURANCE EXCHANGE, Houston, Tex.

This is reported as commencing business in 1911.

SOUTHERN UNDERWRITERS, San Antonio, Tex.

Manager, Van A. Webster.

This is a reciprocal organization inaugurated late in 1907. It insures only merchants with high rating. Only one risk in a block is accepted, and lines are limited to \$10,000. A sum equal to 50% of the premium deposit is required as a reserve. The manager's remuneration (including clerical help) is 15% of the premium deposit. The liability assumed by any underwriter is limited to the amount of the unearned premium deposit and one annual premium, policies being non-assessable. In case of cancellation, the unexpended portions of the premium deposit and

the 50% surplus are returned. It has about 2,000 subscribers and writes business in Texas only.

ADVISORY COMMITTEE: W. T. McCampbell, president State Bank & Trust Co., San Antonio; Ralph Hugo, president Hugo Schmeltzer Co., San Antonio, Tex.; A. G. Castanola, of M. Castanola & Son, San Antonio, Tex.; Wm. Aubrey, counsel and Van A. Webster, manager.

SOUTHERN LUMBER UNDERWRITERS, New Orleans, La.

Attorney, J. E. Warner, 416 Hennen Bldg., New Orleans, La.

This is a strictly inter-insurance association, restricting its operations to lumber mills and allied industries and commenced business June 1, 1908. On June, 1914, cash assets were \$40,971; of which the principal item was \$31,426 of cash in banks, and contingent assets of \$26,746, with liabilities of \$16,805; unearned pre-

miums, \$13,373; losses unpaid, \$2,096; and reserve fund, \$24,666. Its net premiums for the year were \$40,120; and its losses and expenses, \$17,282. The advisory committee is composed of Fred Wilbert, J. F. Wigginton and L. W. Gilbert. J. E. Warner, special agent and inspector.

SOUTH WESTERN RECIPROCAL UNDERWRITERS, Wichita, Kan.

Attorney and Manager, F. L. Wright.

This exchange began business in 1908. It was organized for the purpose of furnishing protection on the inter-insurance plan

to members of the Southwestern Kansas and Oklahoma Implement and Hardware Dealers Association.

SPRINKLERED RISK UNDERWRITERS, Chicago, Ill.

Attorneys and Managers, Wm. and R. M. Williamson, McCormick Bldg., Chicago, Ill.

This is an inter-insurance organization, established April 1 1907, writing on properties protected by automatic sprinkler equipments. The risks are underwritten by the members in pro rata amounts by each of them, without joint liability. The underwriting agreement stipulates that the maximum risk and the maximum insurance in any city block shall be limited to an amount of which the proportion assumed by each member shall not be in excess of the sum denominated in his subscription; also that no policies shall be issued whereby a member's obligations for losses arising from a conflagration shall exceed three times his subscription. The sum of \$2,000 (not a cash deposit) is denominated a member's subscription. Members must be rated by commercial agencies at not less than \$100,000. The maximum line on any single risk, or in any city block, is \$100,000, and each member's underwriting thereof is a proportionately reduced sum as compared to his subscription and continues to be reduced by acquisition of additional members, in lieu of the latter increasing the maximum policy issued. The policies are written at the insurance companies' prevailing rates for the risks,

less an allowance of twenty-five (25) per cent. from premiums. Excess of a member's proportion of premium incomes over his proportion of losses is at the option of the trustees refundable to him annually to the extent of \$200 per annum, pending accumulation of a stipulated reserve, when the entire excess above such reserve is refundable annually. If a member's proportion of the premiums fails to cover his proportion of the losses, he is required to make a deposit of the deficiency. Further underwriting on behalf of a member must be discontinued upon his notice to the managers to that effect, and a retiring member's existing underwritings on policies in force, may at his option be continued to expiration or terminated within thirty days by transfer thereof to his associate members, whereupon the amount to the retiring member's credit is refundable to him. The funds are in the custody of trustees elected annually and who have supervision over the management. Policies covering against loss by sprinkler leakage are also issued by this organization.

The financial statement of this company as of Dec. 31, 1914, shows it to be in a sound and flourishing financial condition.

STANDARD FIRE INSURANCE EXCHANGE, San Antonio, Tex.

This exchange was understood to have commenced business in Texas during 1914, with M. T. Stone as manager.

UNLICENSED AMERICAN FIRE INSURANCE COMPANIES

In this division there was previously presented information concerning American fire insurance companies which were not licensed by the State insurance officials of the States in which the companies were respectively (nominally) domiciled, to conduct insurance business therein. Concerns of this type commonly make broad claims as to the possession of liberal amounts of assets; but as they did not file sworn reports with any State insurance officials, their claimed resources were not subject to scrutiny or verification by any public official. In the absence of such verification, it is usually safe to assume that the assets claimed are either imaginary, or are not owned by the company and are not available for the payment of claims against it. Occasionally a company based upon an old or special charter claims among its privileges thereunder immunity from supervision by the State insurance official of its home State. While such a claim may be made in good faith by an honestly managed company, so many similar claims have been made in the past by concerns which subsequently failed disastrously, that any company failing to report regularly to the State insurance department of its own State is now looked upon with suspicion until it has made some indubitable demonstration of its good faith and its ability and willingness to pay its just debts. As a general rule, it is safer to avoid companies which are unwilling to submit to a proper degree of supervision by duly constituted State authorities, or which are unable to secure the license required to be obtained before doing business. However, there are numerous companies which are regularly licensed in one or more States, and which write some policies upon properties located in other States in which they are not licensed. These companies may be perfectly reliable, financially, being willing to accept a few "surplus lines" in certain States, but not desiring to do a general business therein, and hence not caring to go to the expense of establishing agency plants. As they are licensed in one or more States, even though writing an occasional risk in States in which they are not licensed, such companies cannot be classified as "unlicensed," and will be found listed in other divisions.

UNLICENSED FOREIGN FIRE AND MARINE INSURANCE COMPANIES

In the following pages will be found information relating to foreign fire and marine insurance companies which are known or reported to be writing insurance upon American risks, either directly, through brokers, or by reinsurance arrangements with admitted companies, although we believe that none of them is licensed to transact fire or marine insurance in any of the United States. Few of these companies have any funds in this country, aside from premium balances, none of them, we believe, having a deposit with a State insurance department. The statements presented in this division are, therefore, abstracted from the companies' home office reports, which embrace their transactions in all countries. Care should be taken, when purchasing surplus insurance from foreign unadmitted companies, to deal only with those whose American correspondents are reputable and reliable, and who may be depended upon to safeguard, as far as possible, the interests of American policyholders. As it is necessary, in case of the non-payment of a loss by such a company, to sue the company at its home office (unless it voluntarily submits to the jurisdiction of American courts), it is obvious that, even if such a suit is successful, it is likely to prove a long, wearisome and expensive proceeding. In the case of a policy guaranteed by several companies, a separate suit would have to be entered at the home office of each company. Under these circumstances, it is well to insist upon having some prior knowledge not only as to the company's responsibility at home, but also of the ability and willingness of its American correspondent to meet current losses without undue delay or litigation, before accepting the policy of such a company.

LLOYD'S, London, Eng.

Organised, 1726. Secretary, Rear-Admiral Edward Fitzmaurice Ingfield.

Lloyd's is an association of underwriters in the City of London. Its name is derived from a Coffee House kept by Edward Lloyd in Tower st. in the 17th century, where underwriters met to transact business. In 1692 Lloyd's Coffee House was removed from Tower st. to Lombard st.; and in 1774 Lloyd's left the Coffee House in Lombard st. for premises in the Royal Exchange, where it has since remained. The war, which lasted from 1776 with but short pauses till 1815, tended to attract marine insurance to Great Britain from all parts of the world, and raised Lloyd's to the high position it has since held.

In 1810, parliament appointed a committee to inquire into the affairs of the institution. From this inquiry Lloyd's emerged with credit, and has continued to assist in the promotion of every measure which might aid in the preservation of life at sea, the prevention of fraud in connection with marine insurance, and the rapid collection and distribution of maritime intelligence.

In 1871, Lloyd's was incorporated by act of parliament; but does not, as a corporation, undertake insurance business. This is conducted solely by its members on their own account; and so long as they conform to the rules of the society, they are free to follow their individual views. Lloyd's is, in fact, a great market for insurance. Candidates for election as members are required to satisfy the committee as to their means, and in all cases to deposit in the names of trustees a sum of not less than £5,000, as additional security for liabilities incurred on account of marine and transport risks. The aggregate amount thus placed at the dis-

posal of the committee of Lloyd's is very large, but in no way represents the total capital possessed by the Underwriting Members of Lloyd's. The committee have also recently adopted a system under which a separate guarantee, applicable only to claims on fire policies, and other policies not covering marine and transport risks, is required from members on their admission, and members who engage in such business, and who were elected before the adoption of this system, have generally furnished similar security. A system has also been instituted under which all underwriting monies are held in trust for underwriting purposes only, and underwriters' accounts are annually audited by approved accountants, who certify as to the solvency of the underwriter. The business of Lloyd's as a corporation, and of the committee as its executive, is to conduct the affairs of Lloyd's in its corporate capacity, and to guard, as trustees, the corporate funds and property.

Lloyd's is also an immense organisation for the collection and distribution of marine intelligence, which is published daily in "Lloyd's List." This paper, originally established in 1696 as "Lloyd's News," dates from 1726, and is the oldest newspaper in Europe, with the exception of the "London Gazette." The intelligence department has developed continually under the influence of steam and electricity, and this process keeps pace with the opening of new ports and the increased means of communication. The information is supplied by Lloyd's agents on every coast in the world, who, in written lists, or by telegram,

LLOYD'S, London, Eng.—Continued.

report the arrival and departure of, and casualties to, vessels within their districts. In this connection the value of Lloyd's Signal Stations is very great, not only to underwriters, but also to merchants and shipowners, as it is frequently an advantage that a vessel should be intercepted off the coast and ordered to its port of destination. Shipowners in this way often have the earliest intimation of the arrival of their ships. Vessels arriving off outlying signal stations often bring important intelligence as to derelicts and wrecks passed on their voyages, as well as information of vessels in distress requiring assistance, and overdue vessels arriving on long voyages are reported at these stations. Not one vessel in ten, bound to ports in the United Kingdom from distant ports, arrives at her terminal port without first being reported from one of Lloyd's signal stations. At some of these stations wireless telegraphy apparatus has been installed. The corporation of Lloyd's now holds a similar position with regard to signal stations to that occupied by the corporation of the Trinity House with regard to lighthouses. These valuable aids in the preservation of life and property are one of the latest developments of the corporation.

Recent English legislation requires all underwriters as well as insurance companies transacting such business to provide security for various classes of insurance, such as life, fire, accident, employers' liability and bond investment.

The Assurance Companies Act, 1909, relates to these classes of insurance, and although the Act did not begin to operate until July 1, 1910, the majority of Underwriters at Lloyd's had already complied with its requirements before that date, and for some years past have provided such security as is now legally necessary in connection with the class of business they transact.

The Employers' Liability (insurance companies) Act, 1907 which went into operation on January 1, 1908, provides that every underwriter shall deposit and keep deposited, in such manner as the Board of Trade may direct, a sum of £2,000, and, further, that when the business transacted exceeds this amount, the underwriter must increase the security correspondingly, and furnish accounts annually to the Board of Trade exactly in the same manner as the companies transacting similar business. This deposit has been provided by all members of Lloyd's who engage in this class of insurance business.

By these Acts Lloyd's is recognised by the Board of Trade as a regular market for fire and other non-marine insurance business, and the fact of such recognition is regarded as a guarantee of the soundness of the business transacted at Lloyd's.

Various groups of Lloyd's underwriters accept fire insurance risks in the United States through different brokerage houses in the United States. Claims under such policies are usually settled without difficulty, although if suit should become necessary, each underwriter would have to be sued in the English courts, unless all should agree to abide by the decision of the suit against a single underwriter, which is the annual custom. Policies written by Lloyd's underwriters upon American risks generally contain a warranty that some specified company carries a given line on the same risk at the same rate and in the same form. Property owners in the United States who accept Lloyd's policies should therefore be careful to see that all warranties in such policies are properly observed.

The form of fire policies used by Lloyd's underwriters is as follows:

"LLOYD'S FIRE POLICY.
FOR SIGNATURE BY UNDERWRITING MEMBERS OF LLOYD'S ONLY.

NOW KNOW YE, that we the insurers do hereby bind ourselves, each for his own Part, and not One for Another, our Heirs, Executors, Administrators and Assigns, to pay and make good to the said Assured, his or her Heirs, Executors, Administrators and Assigns, all such Damage and Loss by Fire, within seven days after such loss is proved; and that in proportion to the several sums by each of each subscribed against our respective Names, not exceeding the respective Sums aforesaid; as may happen to the subject matter of this insurance, or any part thereof, during the continuance of this policy.

No claim to attach to this Policy for Insurrection, Riots, Civil Commotion or Military or Usurped power.

If the assured shall make any claim knowing the same to be false or fraudulent as regards amount or otherwise, this Policy shall become void, and all claim thereunder shall be forfeited.

IN WITNESS whereof We have subscribed our Names and Sums of Money by us Insured.

Dated in London, the Day of
One Thousand Nine Hundred and

A considerable number of insurance brokerage firms in New York and Chicago have heretofore had arrangements with various groups of underwriters at Lloyd's, London, whereby they could procure insurance upon American risks, but it is understood that some of such arrangements have been altered or terminated, so that at the time this page went to press it was not feasible to present a list of brokers through whom insurance at Lloyd's, London, could be procured.

Confagration losses: Baltimore, 1904, \$147,500; San Francisco, 1906, estimated, \$3,000,000 (all underwriters).

As bogus Lloyd's, London, policies have been offered in this country, care should be taken to deal only with reliable houses when procuring such insurance.

The State Insurance Department of Illinois requires various groups of underwriters licensed in that State to file, as a part of their annual statements, data concerning their entire business in the United States, together with a certificate from the proper official of the Board of Trade in London, England, to the effect that each group has complied with the laws of the United Kingdom governing such Lloyd's associations.

Brokers accepting surplus line risks in the U. S. through Lloyds of London: Starkweather & Shepley, Inc., Providence, R. I.; R. W. SHORT RATE TABLE AND RULES GOVERNING SAME.

ADOPTED BY THE NEW YORK FIRE INSURANCE EXCHANGE, MARCH 12, 1913.

I. SHORT RATE TABLE FOR ANNUAL OR SHORT TERM POLICIES.

In writing short term policies (i. e., policies having a shorter term than one year), and in canceling at short rates either short term or annual policies, charge or retain the percentage of annual premium indicated in the following table opposite the time for which computation is made:

TIME, DAYS.	Percentage to be Charged or Retained.	TIME, DAYS.	Percentage to be Charged or Retained.
1	2	19	16

II. SHORT RATE TABLE FOR TERM POLICIES WRITTEN AT THREE-FOURTHS OF ANNUAL RATE FOR EACH YEAR AFTER FIRST.

In canceling at short rates a term policy written for two, three, four or five years at three-fourths of annual rate for each year after first, retain the percentage of premium for entire term indicated in following table opposite the time for which computation is made.

[N. B.—The short rate earned premium on a term policy (i. e., a policy having a longer term than one year) written as above but for an irregular term or a term longer than five years is to be ascertained as follows: If cancellation is made before end of first year, use table I. above; if cancellation is made at or after end of first year, add to full annual premium three-fourths of annual premium for each additional year of term after first year, and pro rata proportion of three-fourths of annual premium for each fraction of such additional year.]

NEW ENGLAND SHORT RATE TABLE.

The following tables have been adopted by the New England Insurance Exchange and the Boston Board of Fire Underwriters:

SHORT TERM AND ANNUAL POLICIES.

For writing and cancelling short term policies and cancelling annual policies. Charge or retain the per cent in table below.

For periods of more than two months a part of a month shall be counted as a whole month. Policies shall not be written for two or more short terms during a year at what would be the short rate for the aggregate time of all these terms.

NOTE.—The table in this column is not to be used in cancelling policies written for a term of more than one year.

FOR TERM POLICIES.

Retain the per cent named when a policy is surrendered for cancellation.

STANDARD SHORT RATE SCALE FOR COMPUTING EARNED PREMIUMS.

AS ADOPTED BY NATIONAL BOARD OF FIRE UNDERWRITERS.

These tables have been adopted for use in territory covered by the following named organizations: Eastern Union, New England Insurance Exchange, Western Union, South-Eastern Underwriters Association, Underwriters Association of the Middle Department, Western Insurance Bureau, Underwriters Association of the District of Columbia, Board of Fire Underwriters of Allegheny County (Pa.), Association of Fire Underwriters of Baltimore and Insurance Association of Providence (R. I.), and also for use in New Jersey.

RULE.—Take the percentage indicated in scale opposite the period the risk is to run on the premium for the year or term at the given rate, and the result will be the premium to be retained in case of cancellation, or to be charged in case of short risk.

EXPLANATION.—When a company cancels a policy it returns pro rata premium. When a policyholder cancels, this table is used, so that the company shall only return the pro rata premium less the expense of getting the business.

CHILI.

A bill affecting foreign fire insurance companies transacting business in Chili was passed by the National Congress, and went into effect in December, 1905. The bill divides fire companies into first and second class; those with a capital of 500,000 pesos (\$182,500) and more belong to the former, and those with a capital of less than that sum to the latter. In estimating the capital of a company the reserve and accumulated funds will be considered as capital. Fire companies of the first class will be required to deposit 300,000 pesos (\$109,500) and those of the second class 200,000 pesos (73,000). Companies insuring against maritime and agricultural risks exclusively will be required to deposit 50,000 pesos

(\$18,250). The deposits may be invested in unencumbered real estate in Chili, in currency or sterling, or in bonds of institutions accepted by the President of the Republic.

PROVINCIAL COMPANIES NOT INCLUDED IN OTHER TABLES.

Below will be found a list of fire and marine insurance companies located in the British American Provinces concerning some of which it is practically impossible to obtain information. In addition to these companies there are many purely local mutual companies, the Province of Ontario alone having nearly one hundred, and some foreign companies are licensed in one or more Provinces:

NOTABLE CONFLAGRATIONS IN THE WORLD'S HISTORY.

Even before men began to congregate and build cities, there existed the danger of prairie and forest fires; but these, except in a minor way, were not especially destructive of other property. When cities had been built and many thousands of people came to be housed within a small area, the danger of fire and its capacity for doing harm to men and their property were greatly augmented; and as cities increased in size, the fire hazard and the accumulated values subject to destruction were both correspondingly multiplied. During the last four thousand years many cities have been swept by fire, some of them several times; and some have been practically obliterated. Below will be found a list, compiled from various sources, of some of the more important fires of history, comprising those most notable because of the values or lives destroyed, or for some peculiar reason. The list of fires due to the European war, in 1914 and 1915, is necessarily incomplete:

TAXES PAID BY FIRE INSURANCE COMPANIES IN 1914.

Below will be found a tabulation showing the net premiums written in 1914 by most of the stock fire insurance companies transacting business in the United States, together with the taxes paid by such companies, and ratios showing the percentages of taxes to premiums for the respective companies. This tabulation shows the heavy burden of taxation which is imposed upon fire insurance companies throughout the country by State, county and municipal governments. Included in the taxes are taxes on real estate, State taxes on premiums, insurance department licenses and fees, and all other licenses, fees and taxes, except fire department, patrol and salvage corps assessments, fees, taxes and expenses. The fire department taxes are levied by the State, while the fire patrol assessments, though for the public good, are voluntarily contributed by the companies.

TOTAL FIRE AND MARINE INSURANCE TRANSACTIONS IN THE UNITED STATES.

RECAPITULATION SHOWING AGGREGATES OF CAPITAL, ASSETS, SURPLUS, INCOME AND DISBURSEMENTS OF ALL JOINT STOCK AND MUTUAL FIRE AND MARINE INSURANCE COMPANIES GIVEN IN THE PRECEDING TABLES.

In a few of the States enumerated in the following recapitulation a falling off in capital and assets is shown. This arises occasionally from the fact that some of the companies will not report their transactions or financial standing. Most of those that neglect to do so are mutuals, although some stock companies are delinquent in this respect. The apparent loss of capital and assets in these States may not be a loss in fact.

LAYTON'S IMPROVED ARITHMOMETER

Standard Lightweight Model

A Perfected Calculating Machine of Established Reputation

Price \$300. (Including slide lever)

The value and importance of a first-class and trustworthy calculating machine to actuaries, statisticians, accountants and others dealing with mathematical problems has long been conceded. Such a machine is a great labor and time saver, while the relief it affords from wearying brain work is incalculable.

LAYTON'S IMPROVED ARITHMOMETER

fills all the requirements of such a machine, and the large number in use bear daily testimony to their effectiveness. Insurance companies find this machine of particular value in their daily work and during the many years the original model has been in use it has given universal satisfaction. Valuable improvements in the new model, adding greatly to its efficiency, coupled with the high quality of its workmanship, make this the best and most advanced calculating machine on the market. The above illustration fairly shows its construction and method of operation.

Responsible corporations and individuals may order this machine on 10 days' trial.

We have exclusive contracts with many guaranteed members of this the greatest underwriting association in the world, by which we are able to immediately cover large amounts on desirable risks *irrespective of other amounts on the same properties* obtained through other channels.

For more than thirty years we have conducted this department of business with European and American companies and our facilities are unequalled.

There never is trouble, vexation, or delay in the adjustment of losses when forms have been drawn and risks have been placed through our office.
